

Contoso Corp Workplace Health and Safety Policy

Safety Responsibilities

Every employee is responsible for following posted safety procedures and for reporting unsafe conditions. Facilities management is responsible for maintaining fire suppression systems, emergency lighting, and posted evacuation routes.

Incident Reporting

Any workplace injury, no matter how minor, must be reported to your manager and to Facilities within 24 hours using the incident report form. This applies to injuries at any Contoso location, including client sites.

Emergency Procedures

Fire Evacuation

When an alarm sounds, employees must evacuate immediately using the nearest marked exit and gather at their floor's designated assembly point. Elevators must never be used during a fire alarm.

Medical Emergencies

For a medical emergency, call local emergency services first, then notify building security. Trained first-aid responders and AED locations are posted on each floor.

Workplace Violence Prevention

Contoso has zero tolerance for threats or acts of violence in the workplace, including threats made by phone, email, or social media. Any concern about potential violence should be reported immediately to Security and HR, even if the concern feels uncertain.
